GREEN TIP

Why not make more use of your micro-wave and air fryer rather than your conventional cooker. Many of us just use the micro-wave to heat up a drink or to defrost something, but they can do so much more and save you money. They use much less electricity for the same effect and therefore you are also saving the planet. For example:

4 Portions of boiled new potatoes	M/wave	Cooker
Average Time taken	6 min 30 sec	24 min 30 sec
Energy consumption (kWh)	0.15	0.50
Energy cost	£0.028 (0kg)	£0.094 (0.1kg)

A Prayer

Creator God, when I feel tired and exhausted by the heat, give me moments of joy to revel in the beauty around me. Help me to be more like Jesus in what I say and do, reflecting your heart for our planet and for all who inhabit it. Let me not overlook the signs of distress around me but help me hold on to hope. May I put my trust in you, rooting all my words and actions in faith, and the knowledge that all will be well, and cooler weather will come, Amen.
